ANTIFREEZE / COOLANT

29.852-4

Antifreeze/Coolant

(Blue) Ready Mix 50/50, 1 Gallon

4 PER CASE / 52 CASES PER PALLET

HEAVY DUTY HS READY MIX 50/50 PREDILUTED ANTIFREEZE/ COOLANT is an ethylene-glycol coolant that protects year-round against freezing (down to -34°F), boil-over (up to 265°F), and corrosion under extreme conditions. It's designed for cars, light-duty, and heavy-duty vehicles and has a service life of up to 5 years or 150,000 miles. Its inhibitor package protects all cooling system metals without harming paint or rubber and meets major industry and OEM specifications, including ASTM D3306, ASTM D4985, and ASTM D6210, as well as non-phosphate (European) and non-silicate (Japanese) requirements.

POAT (Phosphate Organic Acid Technology)

* The Maintenance Council of the American Trucking Assoc. Antifreeze also meets the non-phosphate requirements of European OEM's and non-requirements of Japanese OEM's.

Automotive Silicone MEGA BLACK

31.99839 3 oz.

SENSOR SAFE

MegaBlack Silicone is a high-flex, low odor, non-corrosive, sensor/safe, moisture curing gasketing material that cures into a strong silicone rubber that maintains long lasting durability and performance to make formed-in-place gaskets. This tough, flexible silicone rubber gasket resists aging and weathering. Will not harden, shrink, or crack. Non-corrosive to steel, iron, and aluminum.

TEMP. RESISTANCE: -100°F to +650°F
(-73°C to +343°C)

Professional "A" Grade HS IR Nano-Ceramic, Scratch Resistant, Non-Reflective, Non-Metalized, High Heat & UV Rejection

NANO-Ceramic Films, by Herrero & Sons Corp, ensure no signal interference from popular devices such as radios, GPS, key-less entry, cell phones and navigation devices. The unique technology used to produce HS IR Nano-Ceramic makes it the most state-of-the-art automotive film today. The Film provides a proprietary non-metalized, non-conductive Nano-ceramic technology with maximum heat and ultraviolet rejection, excellent optical clarity, and scratch and corrosion-resistant properties. HS IR Nano-Ceramic, dramatically reduce irreversible damage to human skin and vehicle interiors due to harmful ultraviolet (UV), visible, and infrared (IR) rays that penetrate ordinary window glass, while keeping the vehicle significantly cooler. In other words, practically clear films reject high levels of heat as dark films do. HS IR Nano-Ceramic, are light enough to meet visible light transmission laws for windshields in most countries worldwide and provide the ultimate in comfort and protection as well as an elegant image. Installed HS IR Nano-Ceramic, help maintain temperature in interior surfaces of vehicles, offices or homes up to a maximum of 16°C (30°F) much cooler than in comparison with unprotected glass. This reduction in temperature increases the comfort but also reduces the use of air conditioners, helping to reduce energy costs and fuel consumption. Installer friendly films are easily heat-formed and have PS mounting adhesive for rapid install on curve automotive glass.

PERFORMANCE WINDOW FILMS

MADE IN THE USA

Safety / Solar Security "A" Grade Film Scratch-Resistant

Professional grade deep-dyed layer films offer the same protection as the clear security films but also provide heat and glare reduction for increasingly popular automotive and building applications. Film has extra strong, UV-Protected, PS adhesive and a scratch resistant coating. We only use Dupont Teijin® polyester because it is the best quality polyester for safety in the market. Large amount of adhesive on this safety film allow us to surpass American & European standards of impact, shatterproof & drop ball tests.
